

Abdulaziz Essa Harib Alfalahi

*General Superintendent of recruitment operations at the Emirati Human Resources Council,
Consultant at Dubai Government Human Resources Department*

Phone: 0558285000

Email: abdulaziz.harib@gmail.com

Abdulaziz Alfalahi is an accomplished executive with over 25 years of transformative leadership experience in the telecommunications and technology sectors. His career has been marked by a commitment to driving digital transformation, spearheading innovation, and delivering sustainable growth for industry-leading organizations, including the Roads and Transport Authority, du, and Etisalat. A strategic visionary, Abdulaziz has deep expertise in commercial project management, human resources optimization, and advanced data analytics. His leadership in navigating complex regulatory environments and his proficiency in building agile, future-ready organizations make him uniquely qualified to lead digital governance at a national level.

As a hands-on leader, Abdulaziz has successfully managed large-scale projects that have redefined organizational capabilities, leveraging digital tools to streamline operations and enhance service delivery. His EMBA in Strategic Management and practical, on-the-ground experience in evolving global technology landscapes position him to provide strategic direction and governance oversight for government-led digital initiatives.

With an exceptional track record of fostering innovation and managing multidisciplinary teams, Abdulaziz is well-equipped to deliver on the Dubai Government's vision, driving digital transformation efforts that align with the UAE's long-term development goals.

CERTIFICATIONS

August 2022

The Artificial Intelligence Program

The Artificial Intelligence Program in collaboration with the University of Oxford

- Certified in 'The Artificial Intelligence Program' in August 2022.
- This specialized training program is managed by the National Program for Artificial Intelligence in the United Arab Emirates and facilitated by the University of Oxford.
- The program introduces Artificial Intelligence and the latest developments in generative AI, examining the challenges, opportunities, security, and ethical risks associated with its adoption.
- It also offers insights on effectively utilizing AI tools in a modern organization.
- Through this program, I gained a strong understanding of current global trends in Artificial Intelligence technologies, the latest developments in Large Language Models, and their role in our ever-changing world.
- The Artificial Intelligence Program authorizes the certification in collaboration with the University of Oxford.
